- The function of the time setting only alarms the operation time, the equipment won't turn off. So the operator should always be attentive.
- The power cord must not come into contact with any hot part or locations.
- Do not operate during a thunderstorm, unplug the plug and stop using the appliance at once.

Operation

1. When the power on, the buzzer will beep three times. At the same time, the LED will show the previous set time. Then, it will be in this setting time state. If you press the "START/STOP" key, the time will countdown to zero according to the appeared time. When it reaches the set time, the buzzer will beep three times again. If you press the "START/STOP" key again, the alarm will stop and show the preset time.
2. Time setting: if the list is on temperature setting list, press the "SET" key, and it will turn to the time setting list. During setting the time, first, press the "+" (or "-") key, then press the "START/STOP" key, you can set the time. During setting the time, don't release the "+" (or "-") key. If you press the "START/STOP" key one time, the time will increase (or reduce) by one second. If you press the "START/STOP" key continuously, the time will increase (or decrease) very fast. The time range is from 00:00" to 99:59". Please note: If you press the "START/STOP" key only or press the "START/STOP" key first, the list will count down to zero automatically.
3. Temperature setting: if the list is on time setting list, first press the "SET" key, at the same time, press the "START/STOP" key one time, then it will turn to the temperature setting list. If you press the "+" (or "-") key one time, the temperature will increase (or decrease) by one degree. The temperature range is from 124°C to 230°C (255.2°F~446°F). When the setting temperature is higher than the temperature the probe can measure, it will connect to the electric element automatically. It will stop heating when it reaches the setting degree.
4. Time counting: press the "START/STOP" key when the list is on time setting, and the time will countdown to zero according to the appeared time. When it reaches the setting time, the buzzer will beep three times. If you press the "START/STOP" key again, the alarm will stop and show the preset time.
5. The panel can store the previous setting time and temperature. If the probe was damaged in operation, the electric element will stop heating, and will show "Err" in the panel.
6. According the above instructions, the operator can set the time and temperature according to different requirements. Pour the batter on the bottom tray, then close the trays, and press the "START/STOP" key. When it reaches the set time, the buzzer will sound, and the operator should remove the food out of the tray. If the operator does not remove them on time, the food will burn.

Note: the longer the time, and the higher the temperature, the darker the color. If the cooking time is too short, the food will not be cooked and its color will be lighter.
