General Information

Omcan Manufacturing and Distributing Company Inc., Food Machinery of America, Inc. dba Omcan and Omcan Inc. are not responsible for any harm or injury caused due to any person's improper or negligent use of this equipment. The product shall only be operated by someone over the age of 18, of sound mind, and not under the influence of any drugs or alcohol, who has been trained in the correct operation of this machine, and is wearing authorized, proper safety clothing. Any modification to the machine voids any warranty, and may cause harm to individuals using the machine or in the vicinity of the machine while in operation.

CHECK PACKAGE UPON ARRIVAL

Upon receipt of an Omcan shipment please inspect for external damage. If no damage is evident on the external packaging, open carton to ensure all ordered items are within the box, and there is no concealed damage to the machine. If the package has suffered rough handling, bumps or damage (visible or concealed), please note it on the bill of lading before accepting the delivery and contact Omcan within 24 hours, so we may initiate a claim with the carrier. A detailed report on the extent of the damage caused to the machine must be filled out within three days, from the delivery date shown in the shipping documents. Omcan has no recourse for damaged products that were shipped collect or third party.

Before operating any equipment, always read and familiarize yourself with all operation and safety instructions.

Omcan would like to thank you for purchasing this machine. It's of the utmost importance to save these instructions for future reference. Also save the original box and packaging for shipping the equipment if servicing or returning of the machine is required.

Omcan Fabrication et distribution Companie Limité et Food Machinery d'Amerique, dba Omcan et Omcan Inc. ne sont pas responsables de tout dommage ou blessure causé du fait que toute personne ait utilisé cet équipement de façon irrégulière. Le produit ne doit être exploité que par quelqu'un de plus de 18 ans, saine d'esprit, et pas sous l'influence d'une drogue ou d'alcool, qui a été formé pour utiliser cette machine correctement, et est vêtu de vêtements de sécurité approprié. Toute modification de la machine annule toute garantie, et peut causer un préjudice à des personnes utilisant la machine ou des personnes à proximité de la machine pendant son fonctionnement.

VÉRIFIEZ LE COLIS DÈS RÉCEPTION

Dès réception d'une expédition d'Omcan veuillez inspecter pour dommages externes. Si aucun dommage n'est visible sur l'emballage externe, ouvrez le carton afin de s'assurer que tous les éléments commandés sont dans la boîte, et il n'y a aucun dommage dissimulé à la machine. Si le colis n'a subi aucune mauvaises manipulations, de bosses ou de dommages (visible ou cachée), notez-le sur le bond de livraison avant d'accepter la livraison et contactez Omcan dans les 24 heures qui suivent, pour que nous puissions engager une réclamation auprès du transporteur. Un rapport détaillé sur l'étendue des dommages causés à la machine doit être rempli dans un délai de trois jours, à compter de la date de livraison indiquée dans les documents d'expédition. Omcan n'a aucun droit de recours pour les produits endommagés qui ont été expédiées ou cueillies par un tiers transporteur.

General Information

Avant d'utiliser n'importe quel équipement, toujours lire et vous familiariser avec toutes les opérations et les consignes de sécurité.

Omcan voudrais vous remercier d'avoir choisi cette machine. Il est primordial de conserver ces instructions pour une référence ultérieure. Également conservez la boîte originale et l'emballage pour l'expédition de l'équipement si l'entretien ou le retour de la machine est nécessaire.

Omcan Empresa De Fabricacion Y Distribucion Inc. Y Maquinaria De Alimentos De America, Inc. dba Omcan y Omcan Inc. no son responsables de ningun daño o perjuicio causado por cualquier persona inadecuada o el uso descuidado de este equipo. El producto solo podra ser operado por una persona mayor de 18 años, en su sano juicio y no bajo alguna influencia de droga o alcohol, y que este ha sido entrenado en el correcto funcionamiento de esta máquina, y ésta usando ropa apropiada y autorizada. Cualquier modificación a la máquina anula la garantía y puede causar daños a las personas usando la máquina mientras esta en el funcionamiento.

REVISE EL PAQUETE A SU LLEGADA

Tras la recepcion de un envio Omcan favor inspeccionar daños externos. Si no hay daños evidentes en el empaque exterior, Habra el carton para asegurararse que todos los articulos solicitados estén dentro de la caja y no encuentre daños ocultos en la máquina. Si el paquete ha sufrido un manejo de poco cuidado, golpes o daños (visible o oculto) por favor anote en la factura antes de aceptar la entrega y contacte Omcan dentro de las 24 horas, de modo que podamos iniciar una reclamación con la compañía. Un informe detallado sobre los daños causados a la máquina debe ser llenado en el plazo de tres días, desde la fecha de entrega que se muestra en los documentos de envío. Omcan no tiene ningun recurso por productos dañados que se enviaron a recoger por terceros.

Antes de utilizar cualquier equipo, siempre lea y familiarizarse con todas las instrucciones de funcionamiento y seguridad.

Omcan le gustaría darle las gracias por la compra de esta máquina. Es de la mayor importancia para salvar estas instrucciones para futuras consultas. Además, guarda la caja original y el embalaje para el envío del equipo si servicio técnico o devolución de la máquina que se requiere.

Safety and Warranty

The high performance tilting blenders are simple to use and clean. However, for your safety read the following instructions in order to avoid accidents:

1. Always unplug the machine when cleaning, servicing or when any other maintenance operation is needed.
2. Never use tools that do not belong to the machine during operation.
3. Never spray water on the machine.
4. Do not operate the machine while wearing wet clothes or wet shoes.
5. Before operating the machine, make sure it is properly grounded.

Safety and Warranty

6. When washing inside of the cup Nº02 (Pic. 01) ensure power is off and unit is unplugged. Be careful with the blade as it has sharp edges.

GENERAL SAFETY PRACTICES

The following safety instructions are addressed to both the operator of the machine as well as the person in charge of maintenance. The user shall operate the machine only after being well acquainted with the safety procedures described in the present manual. **READ THIS MANUAL THOROUGHLY.**

BASIC OPERATION PRACTICES

Dangerous parts

Some parts of the electric devices are connected to high voltage points. These parts when touched may cause severe electrical shocks or can even be **FATAL**. Never touch commands such as buttons, switches and knobs with wet hands, wet clothes and/or shoes. By not following these instructions, operators could be exposed to severe electrical shocks or even to a **FATAL** situation.

Warnings

The operator has to be well familiar with the position of **ON/OFF** switch to make sure the switch is easily accessible when necessary. Before any kind of maintenance, physically remove plug from the socket. Provide space for a comfortable operation thus avoiding accidents. Water or oil spilled on the floor will cause additional hazards. Make sure the floor is clean and dry. Before giving any manual command (switch, buttons, turn keys or lever) be sure the command is the correct one. Check this manual for further details if necessary. Never use a manual command (switch, buttons, lever) unadvisedly. If any work is to be made by two or more people, coordination signs will have to be given for each operation step. Every step of the operation shall be taken only if the sign has been made and responded.

Advises

In case of power shortage, immediately turn the machine **OFF**. Use recommended or equivalent lubricants, oils or greases. Avoid mechanical shocks as they may cause failures or malfunction. Avoid penetration of water, dirt or dust into mechanical or electrical components of the machine. **DO NOT MODIFY** original characteristics of the machine. **DO NOT REMOVE, TEAR OFF or MACULATE ANY SAFETY or IDENTIFICATION LABELS** stuck on the machine. If any label has been removed or is no longer legible, contact your nearest dealer for replacement.

Safety and Warranty

SAFETY PROCEDURES AND NOTES BEFORE SWITCHING MACHINE ON

IMPORTANT: carefully read **ALL INSTRUCTIONS** of this manual before turning the machine ON. Be sure to be familiar with the instructions and that you have understood all information contained in this manual. If you have any questions contact your supervisor or your nearest dealer.

Danger

An electric cable or electric wire with damaged jacket or bad insulation could cause electrical shocks as well as electrical leak. Before use, unplug and check conditions of all wires and cables.

Advices

Be sure **ALL INSTRUCTIONS** in this manual have been thoroughly understood. Every function and operational procedure have to be very clear to the operator. Contact your nearest dealer for further questions. Any manual command (switch, button or lever) shall be given only after being sure it is the correct one.

Precautions

The electric cable has to be compatible with the power required by the machine. Cables touching the floor or close to the machine need to be protected against short circuits.

RESIDENTIAL USERS: vendor assumes no liability for parts or labor coverage for component failure or other damages resulting from installation in non-commercial or residential applications. The right is reserved to deny shipment for residential usage; if this occurs, you will be notified as soon as possible.

1 YEAR PARTS AND LABOUR BENCH WARRANTY

Within the warranty period, contact Omcan Inc. at 1-800-465-0234 to schedule a drop off to either an Omcan authorized service depot in the area, or to an Omcan Service warehouse to repair the equipment.

Unauthorized maintenance will void the warranty. Warranty covers electrical and part failures, not improper use.

Please see <https://omcan.com/disclaimer> for complete info.

WARNING:

The packaging components (cardboard, polyethylene, and others) are classified as normal solid urban waste and can therefore be disposed of without difficulty.

In any case, for suitable recycling, we suggest disposing of the products separately (differentiated waste) according to the current norms.

DO NOT DISCARD ANY PACKAGING MATERIALS IN THE ENVIRONMENT!

Technical Specifications

MAIN COMPONENTS

All components are made with carefully selected materials, in accordance with Omcan experience and standard testing procedures.

- 01 - Lid.
- 02 - Cup.
- 03 - On/off switch.
- 04 - Stand.
- 05 - Motor.
- 06 - Lock pedal.

Item Number	37969	31502

Installation

PADDLE AND SPRING ASSEMBLY

1. Fit the spring in the holes located at the stand.

2. Place the paddle in the frontal cut of the stand.

3. Press the paddle's back portion down (as indicated in the red arrow below), tensioning the spring. During this process, it is important to hold the spring in its place, fitted to the holes in the stand, to avoid any misplacement.

Installation

- With the spring tensioned, push the paddle back until it fits in the rear cut of the stand.

- Fit the paddle's hole to the stand pin and shown below.

- Check to see if the paddle is working correctly.

The high performance tilting blenders were developed to be used in 110V. Grounding is mandatory.

Installation

PRE OPERATION

First of all check if the blender is firm on its position. Check if motor (Nº01) is perfectly fitted on the lock pedal (Nº02) as shown on Picture 2.

Picture 2

IMPORTANT: before doing any maintenance to the machine switch it OFF and unplug it.

Operation

STARTING

The blender is activated by turning the on/off switch Nº03 (Pic.01) to **ON** position.

OPERATING PROCEDURES

The high performance tilting blender works at high speed (approximately 3.500 rpm, 50Hz). To feed it proceed as follows:

1. Remove the lid Nº01 (Pic.01).
2. Put product inside the cup Nº02 (Pic.01) with the machine switched **OFF**.
3. Place the lid Nº01 (Pic.01) back on top of the cup and switch the machine **ON**.

NOTE: due to turbulence generated when machine is **ON** do not turn it **ON** without the lid Nº01 (Pic.01). The processing time depends on the kind of product.

IMPORTANT: NEVER SWITCH THE MACHINE ON WITHOUT PRODUCT IN IT BECAUSE IT WILL CAUSE IRREPARABLE DAMAGES.

IMPORTANT: it is not recommended to blend products without the addition of any liquid, otherwise it will overheat and damage the cup seal.

Operation

DISCHARGING PROCEDURES

To discharge processed product from blender models proceed as follows:

1. Turn machine OFF.
2. Remove lid N°01 (Pic. 01).
3. Press lock pedal N°06 (Pic. 01) down.
4. Tilt cup N°02 (Pic. 01) holding its handle and discharge processed product as needed.

Maintenance

CLEANING

The new blenders cup has stamped ribs that facilitate cleaning. Wash the lid N°01 and the cup N°02 (Pic. 01) with water and neutral soap. Wipe up the other parts with a damp cloth.

IMPORTANT: never do cleaning with machine plugged in. Always unplug machine before cleaning. When washing inside the cup be careful with the blade.

MAINTENANCE

Danger

Any maintenance with the machine in working situation is dangerous. **TURN IT OFF BY PULLING THE PLUG OFF THE SOCKET DURING MAINTENANCE.**

IMPORTANT: always unplug the machine when emergency cases arise.

Advice

Electrical or mechanical maintenance must be done by qualified personal for such operation. Person in charge has to be sure that the machine is under **TOTAL SAFETY** conditions when working.

ROUTINE INSPECTION - UNPLUG MACHINE

Advice

When checking the tension of the belts or chains, **DO NOT** introduce your fingers between the belts and the

Maintenance

pulleys and nor between the chain and the gears.

Precautions

Check if motors and sliding or turning parts of the machine produce abnormal noises. Check the tension of the belts and chains and replace the set when belt or chain show signs of being worn out. When checking tensions of belts or chain **DO NOT** introduce your fingers between belts and pulleys, nor between the chains and gears. Check protections and safety devices to make sure they are working properly.

OPERATION

Advice

Be sure your hair is not loose in order to avoid getting caught by turning parts which could lead to a serious accident. Tie your hair up and/or cover your head with a scarf. The operation performed by untrained personnel shall be forbidden. Never touch turning parts with your hands or in any other way. **NEVER** operate machine without all original safety devices under perfect conditions.

CAUTIONS WITH STAINLESS STEEL:

The stainless steel may present rust signs, which **ARE ALWAYS CAUSED BY EXTERNAL AGENTS**, especially when the cleaning or sanitization is not constant and appropriate. The stainless steel resistance towards corrosion is mainly due to the presence of chrome, which in contact with oxygen allows the formation of a very thin protective coat. This protective coat is formed through the whole surface of the steel, blocking the action of external corrosive agents. When the protective coat is broken, the corrosion process begins, being possible to avoid it by means of constant and adequate cleaning. Cleaning must always be done immediately after using the equipment. For such end, use water, neutral soap or detergent, and clean the equipment with a soft cloth or a nylon sponge. Then rinse it with plain running water, and dry immediately with a soft cloth, this way avoiding humidity on surfaces and especially on gaps. The rinsing and drying processes are extremely important to prevent stains and corrosion from arising.

IMPORTANT: acid solutions, salty solutions, disinfectants and some sterilizing solutions (hypochlorites, tetravalent ammonia salts, iodine compounds, nitric acid and others), must be AVOIDED, once it cannot remain for long in contact with the stainless steel.

These substances attack the stainless steel due to the **CHLORINE** on its composition, causing corrosion spots (pitting). Even detergents used in domestic cleaning must not remain in contact with the stainless steel longer than necessary, being mandatory to remove it with plain water and then dry the surface completely.

Use of abrasives:

Sponges or steel wool and carbon steel brushes, besides scratching the surface and compromising the stainless steel protection, leave particles that rust and react contaminating the stainless steel. That is why such products must not be used for cleaning and sanitization. Scrapings made with sharp instruments or similar must also be avoided.

Main substances that cause stainless steel corrosion:

Dust, grease, acid solutions such as vinegar, fruit juices, etc., saltern solutions (brine), blood, detergents

Maintenance

(except for the neutral ones), common steel particles, residue of sponges or common steel wool, and also other abrasives.

ANALYSIS AND PROBLEMS SOLVING

Problems, causes and solutions

The high performance tilting blenders were designed to operate with the need of minimum maintenance but the natural wearing caused by long use of the equipment may occasionally cause some malfunctions. If such problem occurs with your blender refer to table below in which the most common situations are listed with recommended solutions.

Problems	Causes	Solutions
The machine does not turn on.	Lack of power.	Check if machine is plugged in and if there is power in the power supply source.
	Problem in the electric circuit of the machine.	Call technical assistance.
Cup is leaking.	Damaged seal.	Call technical assistance.

Since 1951 Omcan has grown to become a leading distributor of equipment and supplies to the North American food service industry. Our success over these many years can be attributed to our commitment to strengthen and develop new and existing relationships with our valued customers and manufacturers. Today with partners in North America, Europe, Asia and South America, we continually work to improve and grow the company. We strive to offer customers exceptional value through our qualified local sales and service representatives who provide convenient access to over 6,500 globally sourced products.

Depuis 1951 Omcan a grandi pour devenir un des “leaders” de la distribution des équipements et matériel pour l’industrie des services alimentaires en Amérique du Nord. Notre succès au cours de ces nombreuses années peut être attribué à notre engagement à renforcer et à développer de nouvelles et existantes relations avec nos clients et les fabricants de valeur. Aujourd’hui avec des partenaires en Amérique du Nord, Europe, Asie et Amérique du Sud, nous travaillons continuellement à améliorer et développer l’entreprise. Nous nous efforçons d’offrir à nos clients une valeur exceptionnelle grâce à nos ventes locales qualifiées et des représentants de service qui offrent un accès facile à plus de 6500 produits provenant du monde entier.

Desde 1951 Omcan ha crecido hasta convertirse en un líder en la distribución de equipos y suministros de alimentos en América del Norte industria de servicios. Nuestro éxito en estos años se puede atribuir a nuestro compromiso de fortalecer y desarrollar nuevas relaciones existentes con nuestros valiosos clientes y fabricantes. Hoy con socios de América del Norte, Europa, Asia y América del Sur, que trabajan continuamente para mejorar y crecer la empresa. Nos esforzamos por ofrecer a nuestros clientes valor excepcional a través de nuestro local de ventas y representantes de los servicios que proporcionan un fácil acceso a más de 6,500 productos con origen a nivel mundial.
